TOPIC 1 Linear Equations and Inequalities

Name _____ Date _____

1. What is the solution set for $3(4 - x) > -2x + 10$?

A. $x < 2$

B. $x > 2$

C. $x \leq -2$

D. $x > -2$

2. Solve the inequality, and graph the solution on the number line.
$1.5m + 4 \geq -2(m - 9)$

3. Solve the inequality.
$-2(x + 1) \geq 8$
