TOPIC 1 Linear Equations and Inequalities

Name _____ Date _____

1. The formula for the area of a rectangle is $A = \ell w$. Solve the equation for w.

***w* = *A*/ℓ**

Divide both sides by ℓ

2. The formula for the volume of a cylinder is $V = \pi r^2 h$. Solve the equation for h.

***h* = *V*/(π*r*²)**

Divide both sides by πr^2

3. Which equation is $d = rt$ solved for r?

A. $r = dt$

B. ***r* = *d*/*t***

C. $r = t/d$

D. $r = d - t$

Divide both sides by t

4. The lateral surface area of a can is $S = 2\pi rh$. $S = 37.68$ square inches and $r = 1.5$ inches. Use 3.14 for π. What is h?

***h* = 4 in.**

$h = S/(2\pi r) = 37.68 \div 9.42 = 4$
