Retest · Algebra I Module 2 Topic 1

Form A · 4 questions

Name _____ Date _____

Answer each question. Show your work, then write your answer in the box. Write points as ordered pairs (x, y).

1. What is the point of the line given by the point-slope equation $y - 5 = \frac{2}{3}(x + 1)$?

Enter your answer as an ordered pair.

Show your work here

Answer:

2. Rewrite the equation in slope-intercept form. Simplify your answer.

$y - 2 = 3(x - 4)$

Show your work here

Answer:

3. What is the equation in slope-intercept form of a line with a slope of $\frac{1}{3}$ that passes through the point (−3, 2)?

Show your work here

Answer:

4. What is the slope of the line given by the equation $2x + 5y = 10$?

Show your work here

Answer:

Form B · 4 questions

Name _____ Date _____

Answer each question. Show your work, then write your answer in the box. Write points as ordered pairs (x, y).

1. What is the point of the line given by the point-slope equation $y + 2 = \frac{5}{4}(x - 8)$?

Enter your answer as an ordered pair.

Show your work here

Answer:

2. Rewrite the equation in slope-intercept form. Simplify your answer.

$y + 5 = -2(x - 1)$

Show your work here

Answer:

3. What is the equation in slope-intercept form of a line with a slope of $\frac{3}{4}$ that passes through the point (4, −1)?

Show your work here

Answer:

4. What is the slope of the line given by the equation $4x - 2y = 8$?

Show your work here

Answer:

Form C · 4 questions

Name _____ Date _____

Answer each question. Show your work, then write your answer in the box. Write points as ordered pairs (x, y).

1. What is the point of the line given by the point-slope equation $y - 7 = -\frac{1}{2}(x + 3)$?

Enter your answer as an ordered pair.

Show your work here

Answer:

2. Rewrite the equation in slope-intercept form. Simplify your answer.

$y - 6 = 5(x + 2)$

Show your work here

Answer:

3. What is the equation in slope-intercept form of a line with a slope of $-\frac{2}{5}$ that passes through the point (5, 1)?

Show your work here

Answer:

4. What is the slope of the line given by the equation $6x + 3y = 9$?

Show your work here

Answer:
