TOPIC 2 Systems of Linear Equations and Inequalities

Name _____ Date _____

Reminders

System of inequalities: graph and shade each one; the overlap is the solution set.

A solution makes EVERY inequality true. Points on a dashed line are not solutions.

In a story: no negative amounts, so stay in the first quadrant.

1. Where is the solution set of $y > \frac{2}{3}x + 1$ and $y < -\frac{2}{3}x + 1$?

A. between the lines, left of where they cross

B. between the lines, right of where they cross

C. above both lines

D. below both lines

2. Which point is a solution of $y > \frac{2}{3}x + 1$ and $y < -\frac{2}{3}x + 1$?

F. (3, 0)

G. (−3, 0)

H. (0, 1)

J. (0, −2)

3. Explain why (0, 1) is not a solution of $y > \frac{2}{3}x + 1$ and $y < -\frac{2}{3}x + 1$.
