TOPIC 2 Systems of Linear Equations and Inequalities

Name _____ Date _____

1. Solve: $y = 2x + 1$ and $4x - 2y = -2$.

A. No solution

B. (0, 1) only

C. (1, 3) only

D. Infinitely many solutions

2. Floor seats cost \$10 more than balcony seats. 300 floor seats and 200 balcony seats bring in \$8000. Which system models this?

F. $f = b + 10$ and $300f + 200b = 8000$

G. $b = f + 10$ and $300f + 200b = 8000$

H. $f = b + 10$ and $200f + 300b = 8000$

J. $f + b = 10$ and $300f + 200b = 8000$

3. Solve the concert system from Question 2. What does each seat cost?
