Lesson Plan · Monday, November 2

Algebra I · Mr. Pandey · Module 2, Topic 2, Topic 2 Review (test Tue Nov 3) · essentials only (✪)

Objectives (students will…)

- Practice every question type on the End of Topic 2 Assessment, in test order.
- Fix the two biggest errors: inside vs. outside shifts and domain vs. range.
- Write parallel and perpendicular lines through a point, and read zeros and slopes from graphs.

TEKS

- **A.2C**, **A.3C** (readiness), A.2A, A.2E, A.2F, A.2G, A.3E

Key terms

- translation · dilation · domain · range · parallel · perpendicular · zero · point-slope form

Materials

- Topic 2 Review Test: assessment/M2 TOPIC 2/Topic2-Review-Test.pdf + key (IEP and 504 versions)
- Slides: Module 2 topic 2/t2-test-review-slides (.html/.pptx) · online self-check: t2-test-review.html
- Bell work and exit ticket: BELL WORK/T2-Bell-Work-Mon-11-02.pdf, EXIT TICKET/T2-Exit-Ticket-Mon-11-02.pdf + keys (IEP/504 too)
- Whiteboards, index cards (test tips)

Bell work (on the board)

- Kai graphed f(x) and g(x) = f(x + 5). Which statement describes how the graphs are related? C. translated left 5 units
- A pool rental costs $50 plus $30 per hour, for at most 4 hours. What is the range for one rental? J. $50 \le y \le 170$
- What is the slope of a line perpendicular to $y = -4/5x + 2$? A. 5/4
- A line passes through (0, −3) and (6, 0). What is the zero of the function? G. 6

Agenda (60 minutes)

Time	Activity	What to do / say
0–5	Bell work	Four test warm-ups (slide 2). Hand out the printed review.
5–15	I do · Review Q1–3	Q1 $a = -2/3$ Q2 C. $75 \le y \le 175$ Q3 H. $y = -20$; slope zero Model crossing out the domain choices on Q2.
15–32	We do · Q4–8 (pairs, whiteboards)	Q4 C. right 3 Q5 −7 Q6 $g(x) = 2x$ Q7 $y = -2/3x - 4$ Q8 $y = -2.4x + 12$ Re-teach any item under 70% on the spot.
32–45	You do · Q9–10 (silent, test conditions)	Q9 $y - 5 = 2(x - 2)$ Q10 F and J Pull a small group for Q4–6 (transformations).
45–53	Extra practice	Q11–14 on paper, or the online self-check t2-test-review.html. IEP/504: read aloud on request, properties/notes card, extra time.
53–58	Exit ticket + test tips card	1. C. $x = -7$; slope undefined 2. $y = 5x + 5$ 3. 7 Students copy the 6 test tips (last slide) on an index card.
58–60	Wrap up	Test tomorrow: 10 questions, same order as the review. Bring a pencil and calculator.

Check for understanding

- Whiteboards on Q4–8; re-teach any item under 70%.
- Exit ticket: 2 or more wrong → reminders card on test day.

After class

- Sort exit tickets: who needs a reminders card or small-group seating tomorrow.
- Retakes Wed Nov 4: use the real test key's item analysis page.

The printed review mirrors the publisher End of Topic 2 Assessment item for item (same skill, format and order; new numbers).
